

# David Wells

SOFTWARE ENGINEER

## Profile

Detail-oriented Software Engineer with hands-on experience scripting within the case management software Visualfiles. Proficient in customizing and automating legal workflows, I bring a flexible approach to problem-solving. Having a track record of utilizing other technologies where needed, I thrive in environments that require adaptability and continuous learning. Having experience delivering tailored solutions to improve system efficiency and user experience, I am eager to leverage my varied skill set in a dynamic, forward-thinking role.

## Employment History

### Software Engineer, Horwich Farrelly, Manchester

JUNE 2021 – AUGUST 2024

- Develop and support the case management software Visualfiles.
- Improving existing case creation processes through both Visualfiles scripting and using external services such as web portals.
- Developing solutions based on business and external client requirements.
- Collaborated with members of the firm and other developers to provide quick and efficient solutions to business requirements.
- Utilized SQL to query and manipulate large datasets for analysis and reporting.
- Undergoing a the QA course **Developing Microsoft Azure Solutions**

### Visualfiles Developer, Lester Aldridge, Bournemouth

APRIL 2018 – JUNE 2021

- Developing processes for a new Visualfiles case type, requiring me to set up new screens, workflows and letters in collaboration with the other Visualfiles developers.
- Testing and code reviewing changes made by other developers prior to UAT.
- Working closely with legal staff to develop solutions that match what they require.
- Using SQL and Visual Studio to produce SSRS reports for external clients.
- Undergoing the **Querying SQL Databases** week long training course with QA

### Network Engineer, IT4Automation, Epsom

APRIL 2017 – APRIL 2018

- Attending monthly cyber security training provided by QA in London.
- Monitoring critical network infrastructure and responding to anomalies.
